Group Results

Non-controlling interests

The decisive actions taken by CIEL in response to the global pandemic in early 2020 have enabled the Group to emerge stronger and leaner out of the crisis. Group revenue of MUR 17.9 bn and EBITDA of MUR 2.7 bn resulted in an EBITDA margin of 15.1% for the financial year ended 30 June 2021 (2020: 14.6%), despite revenue that has not yet fully recovered to pre-pandemic levels. CIEL's profit after tax for the year stood at MUR 446M compared to MUR 2,178M losses in the prior period.

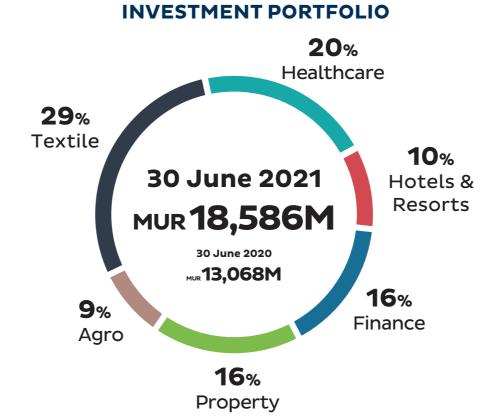

On the operational front, the diversified portfolio has delivered improved margins in all investment sectors ("clusters"), except for Hotels & Resorts which continues to be severely affected by the net effect of lockdowns in Mauritius and international travel restrictions. The Textile and Healthcare clusters have demonstrated remarkable agility in capturing new growth opportunities brought about by the evolution of demand in their respective end markets, in Mauritius (Healthcare) and abroad (Textile/ Healthcare). The Finance cluster continued its resilient performance despite a difficult operating environment. Management took the decision to split the Agro & Property cluster into two distinct operating and reporting segments. This will allow the teams to prioritise their focus and better optimise each business' contribution to CIEL Group's profit. The Property cluster results include the non-cash revaluation of land of MUR 945M for the sustainable development project at Ferney. The revaluation which led to the change in the use of the land from agricultural to bare developable land was conducted after the Group received a letter of intent from the Economic Development Board of Mauritius.

The global crisis did not stop the Group from looking to the future and continuing to work on the quality and resilience of its portfolio: it divested certain non-core assets such as the Kanuhura resort in the Maldives and the healthcare insurance business in Uganda.

Full Year ended 30 June 2021 - financial performance shows marked improvement

- Revenue totalled MUR 17.9 bn: a significant rebound in Q4 helped alleviate the year-on-year decline of 15%. Growth in the Healthcare (+26%) and Finance (+9%) clusters further assisted in mitigating the impact of the pandemic from the Hotels & Resorts business (-89%).
- Earnings before Interest, Taxation, Depreciation, Amortisation, Impairment, Reorganisation costs and Fair Value gain on investment property (EBITDA) stood at MUR 2,697M, down 12%. This demonstrates the effectiveness of the numerous cost-saving initiatives deployed throughout the Group. The EBITDA margin increased slightly compared to the prior year, with a much improved fourth quarter compared with the low base of comparison for the fourth quarter in 2020.
- Profit after taxation of MUR 446M, was a marked improvement on the loss after taxation of MUR 2,178M in 2020.
- Profit attributable to owners increased and stood at MUR 617M (2020: Loss attributable to owners of MUR 1,680M).
- Free cash flow reduced by 26% to MUR 986M from MUR 1,325M on the prior period, due mainly to the continued absence of cash generation in the Hotels & Resorts cluster, and the increased working capital needs in the Textile cluster following its rebound. However, free cash flow improved in the Finance cluster and posted a significant increase in the Healthcare cluster.
- Net interest-bearing debt, half of which comes from the Hotels & Resorts cluster and is not guaranteed by the Group, was reduced to MUR 14.2 bn from MUR 17.1 bn in 2020 with a gearing ratio standing at 39% (June 2020: 48%). Funding from the Mauritius Investment Corporation (MIC) for Sun Limited in the form of a quasi-equity instrument largely accounted for this reduction in the Group's indebtedness. As at 30 June 2021, a disbursement of MUR 2.3 bn from the MIC from a total approved funding line of MUR 3.1 bn has been received.

and reinstates dividend

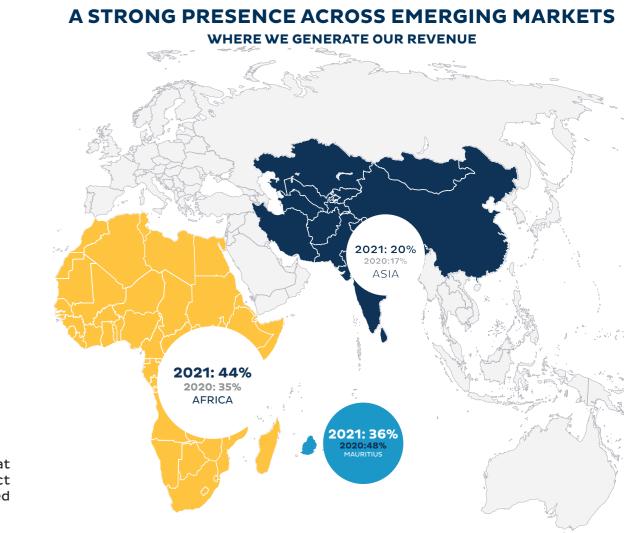

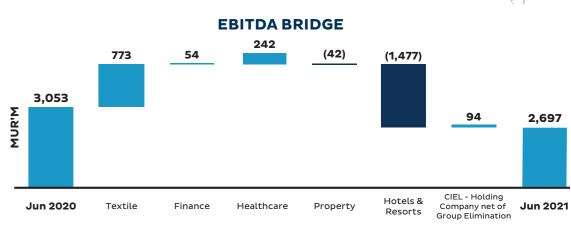

A DIVERSIFIED AND WELL-BALANCED

Company Net Asset Value per share rose by 55% to MUR 9.28 as at 30 June 2021 from MUR 6.00 as at 30 June 2020, reflecting the positive impact on the total portfolio value of the appreciation of the share prices of our listed entities and increase in the valuation of our unquoted investments.

c) Cash flow from operations net of working capital movements after recurrent capital expenditure (excluding specific banking working capital movements

In 2021, the Group made progress on its journey of adapting its operating model to the global pace of change, as uncertainty endured. In parallel, it continued to revisit and reshape its asset allocation strategy and de-risk the profile of its portfolio.

CIEL Textile

Continued and robust momentum in the Textile cluster with an outstanding performance from the Knits and Knitwear segments led to a 2.4 times increase in the cluster's EBITDA versus the prior period, further supported by favourable exchange rates despite higher raw material prices, logistics and restructuring costs. All lines of business are currently seeing an increase in demand, coming back from pre-COVID levels, following the reopening of our main markets, namely the UK, EU and USA, the renewed competitiveness of our operations and the ongoing supply chain shift away from China. The risk of new lockdowns in countries where the Textile cluster operates, particularly in India and Madagascar, continues to be on the agenda if local vaccination rates remain low. In August 2021, CIEL Textile, through its subsidiary Aquarelle, entered a strategic partnership with the SOCOTA Group (COTONA) in Madagascar for the creation of the largest woven fabric mill in the Indian Ocean region which should ensure the sustainability and competitiveness of our woven operations in the region.

CIEL Finance

The Finance cluster continued to show resilience with a 5% increase in EBITDA on the prior period, a good performance given the high pandemic related risk provisions under the IFRS 9 model. However specific write-offs on the loan book for our two banks have cumulatively been reduced by 65% over the prior year. The strength of the banking operations in Madagascar is reflected in the revenue increase over the last twelve months leading to excellent fourth quarter profits. The banking businesses maintained strong capital and liquidity positions, giving management the opportunity to invest in growth and digital transformation projects despite challenging macroeconomic conditions.

CIEL Healthcare

The utmost importance of healthcare and its effect on populations across the globe has been greatly highlighted over the last 18 months since the outbreak of the pandemic. In Mauritius, the Healthcare cluster demonstrated a strong performance on the back of increased activities at C-Care owing to the addition of more beds, and lab collection centres. Revenue picked up better than expected after the initial lockdown in March 2020. International Medical Group, the Ugandan operations, were optimised with the transfer of the insurance book in May 2021. EBITDA increased by 73%, largely due to growing demand for our healthcare services and increased bed capacity. The cluster continues to invest in new clinics and targeted projects and has a deliberate focus on further improving patient experience, expertise, and supply chain management.

CIEL Properties

Non-core Group properties will be consolidated into a property portfolio with assets under management of MUR 4.2 bn. The strategy includes converting non-core industrial properties into yielding assets as part of the new property company which will operate as a stand-alone subsidiary by June 2022 and be managed by a dedicated asset management team. The conversion of Ferney into an integrated sustainable development under a smart city scheme, a medium to long term project, will start from next calendar year. In addition, the potential use of non-developed land owned by the Group will be assessed over the coming year and could include property development. Profitability of the cluster was positively impacted by the revaluation of Ferney land.

CIEL Hotels & Resorts

Operations continued to be impacted by the pandemic with border closures in Mauritius and subsequent low rates of travel tourism. Consequently, EBITDA was substantially reduced from prior year due to 2021 taking the full impact of the pandemic, which resulted in the destination being closed to foreign visitors for the entire financial year under review. The Hotels & Resorts cluster managed to significantly lower its cost base, bringing its fourth quarter EBITDA into positive territory for the first time since March 2020. The restructuring of operations, the divestment of Kanuhura and financial support from the MIC, have restored cash flows and facilitated the alleviation of the debt burden. Other government support measures such as the Wage Assistance Scheme and Bank of Mauritius lines of credit, and the moratorium period on existing debt repayments with banks, were successfully negotiated. The necessary funding was therefore secured to meet short to medium term commitments. As borders reopen, trading revenues are still uncertain as sanitary protocols prevail, but management is however encouraged by the recent increase in the reservation trend.

CIEL Agro

Significant improvement in the Agro cluster (reflecting the 20.96% stake in Alteo) over the financial year with CIEL's share of profit attributable increasing to MUR 244M (2020: loss of MUR 23M). Sugar businesses in Mauritius, Tanzania and Kenya showed marked improvement on the prior period, mainly due to the strengthening of sugar operations on the back of higher production in Kenya and better sugar prices in Mauritius and Tanzania.

On 29th September, the CIEL Board on consideration of the Group's marked improvement in its financial performance and its strong capital position, declared an interim dividend of 5 cents per share relating to the financial year ended 30 June 2021. This dividend will be exceptionally paid this year on or around 29th October 2021. Going forward CIEL will be declaring its annual dividend around the end of June.

CIEL is encouraged by the strength of its portfolio and the ongoing turnaround in most of its underlying businesses. The teams continue to optimise business operations, capital allocation and digitalisation journeys to enhance the long-term value of the Group. With its long-standing diversification and presence in the region and in South East Asia, CIEL is well positioned to benefit from the recovery in global markets, while generating net positive foreign currency income.
